- Directories

Over 1,300
Registered Users

“...There is no way our church could accomplish its mission of leading people into a growing relationship with Jesus Christ without this fantastic, user - friendly tool.”

Gidget J, North Point
Community Church

Use Roll Call to capture contact information, attendance, group and class involvements as well as special interest and talent information. Use this information to determine how people are involved in your church. Are they attending regularly? What are their volunteer interests? Capture information you are interested in by using the custom fields. Stay in contact with your congregation by using the mail merge program, e-mail editor or label generator that is included in Roll Call.

Roll Call is an integrated software solution for your church. It combines membership, donation, attendance, directory, groups, classes and child check in functionality in one package. It is extremely easy to use, yet flexible to meet your specific needs. Roll Call can be run on Windows, Macs or on a combination of both on a network.

*Please contact CAA Ministries today for more information,
and schedule an online demonstration.*
