Dear Pastor & Church Leaders,

As you well know, we are living in a day when we are being bombarded with all kinds of software packages to help manage our church resources. Sometimes it can become confusing and trying as you try to discern which is the best for your congregation. You desire one that will give you the information programs you need.

Several years ago I was privileged to meet Mike Turner and be introduced to CAA Ministries. Mike has a real desire and heart for ministry within the local church. As you study his software packages, you will discover tools that will assist you and your church in being effective. He will be able to help you keep up with your membership, Sunday School, and financial records in a database that will help you make good decisions based upon the information provided.

I encourage you, as you seek the best software packages for your church and future growth, to consider Mike Turner and the software he can provide through CAA Ministries.

Sincerely,

Dr. Frank Cox
Senior Pastor
