Dear Pastor:

As your church grows and you begin looking at software programs to manage your resources, I encourage you to look at the package offered by Mike Turner and CAA Ministries. Mike has a heart for ministry and the local church and his software program reflects that.

Even in the smallest church, I believe it is important to keep membership, Sunday School and financial records in a computer software database. In addition to the ease of information management, it also offers a higher level of security to confidential information. The program Mike has developed offers all of these things.

As you research the options available to you, please include Mike Turner and CAA Ministries.

In Christ,

Dr. Billy Britt, Pastor
