Sundial-CEF

The All in One Church Scheduling Solution!

Calendar, Event, and Facilities Management Program

After almost a year of development and consulting with different church administrators CAA Ministries released its new Church Calendar, Event, and Facilities Management Program called "*Sundial-CEF*". The program offers everything needed to manage events, resources, and a church facility with very few limitations. Specifically designed for the use in a church the program will offer many unique features and functions. It is a totally web based calendar and program that includes a password protected login dash board and control panel for easy access, management, and setup by the church's administrator or staff. Church member or anyone visiting the church's website will be able to view a beautifully designed and personalized calendar that will include complete details for all activities scheduled throughout the church. When scheduling a specific meeting or event options may be activated to require signup and registration, online payments, or to just to view the event details. One unique option will allow individual to request to be added to a waiting list if the maximum capacity for an event has been reached. The Facilities management features are programmed to the church's specific layout of rooms and buildings. Tracking and assuring that a location is available or whether it will meet the needs for any meeting or event needing to be scheduled will be a breeze with this new program. Also, the administrator and church staff will have many viewable reports available with options for printing when needed. The program has been designed and priced to meet the needs and budgets of any size church. Churches may take advantage of a free 45 day trial period before deciding to purchase the program.
