**When rating your Group or SS Cass the objective should be to score a "5" in each area not an overall total score. Areas with the lowest scores should be focused on first for improvement or implementation. Enlist all class members in discussions and activities for identifying what your class can do to improve the scores, and become a well organized evangelistic and ministry focused class. Once a quarter re-rate your group/class using the this Check-Up sheet to assure your class stays active and focused in all areas.*
